

ClearBill separates corpus construction from grounded question answering

The same MiniLM embedding model connects an offline public-guidance index to an online retrieve → refuse-or-generate RAG path.

TRUST + EVIDENCE BOUNDARY

BROWSER	only mode is public; Astra and HF credentials stay server-side	MODEL	25 s timeout; answer must use supplied context only	EMPTY RETRIEVAL	422 before generation —no general-knowledge fallback	SCOPE	educational guidance; no PHI, coverage, or amount-owed decision
