

ClearBill keeps the statement, evidence, and answer boundary visible

The demo is deterministic; the live server retrieves bounded context and refuses before generation when no usable passage exists.

A03 Network discount and plan payment	-\$282.00	Applied	\$0.00

NOT A BILL

Compare this statement with the provider invoice before paying. Amounts and identities shown here are synthetic.

QUESTION

What is an Explanation of Benefits?

CLEARBILL

An Explanation of Benefits is not a bill. It is your insurer's record of how a claim was processed.

Compare these fields before paying:

1. Amount billed - what the provider submitted.

2. Allowed amount - the insurer's negotiated or recognized price.

3. Plan paid - the amount paid by insurance.

4. You may owe - deductible, copay, coinsurance, or a non-covered amount.

Match the provider, date of service, and claim number against the bill you received. If the amounts do not line up, call the number on the EOB and ask whether the claim was finalized or adjusted.

QUESTION FOR THIS STATEMENT

Ask what changed, what you owe, or what to verify next.
